transfer arm

- Arm motion allows chair to be positioned near bed prior to raising the arm, providing a quick and safe transfer
- Available on right, left or both sides
- When in the raised position, the arm is counterbalanced to remain open
- Transfer arm option available with straight back style only

renewability

Wieland's patent pending Quick Change Mechanism System, on all Cove models, supports renewability. Release the security latch and follow the steps below to renew upholstery.

Wieland products are not designed, manufactured or certified for any specific medical treatment or emergency procedures. The Trendelenburg recliner is designed to recline to a point that the feet and lower legs are raised above the head.

GREENGUARD® Certification applies to specific options. greenguard.org
