

allay

WIELAND

families stay close

A comfortable place to rest with a quick and easy conversion, the award-winning Allay® welcomes family caregivers, encouraging them to participate in the recovery process. The trundle bed option provides space for a second family member to stay close as well – a feature rarely found in patient room environments.

space saving

Available in several lengths, the soft top arm option extends the sleep surface an additional eight inches in tight spaces. An integrated pull handle makes the conversion from sofa to sleep position simple and intuitive, reducing the number of nurse calls needed during stay.

designed for family and friends

The angled seat and contoured back provide unprecedented comfort without sacrificing a restful sleep surface. An array of arm styles, including a recessed arm, allow for easy egress. The ottoman offers visitors another way to relax, and an optional drawer stores family belongings or ready-to-use linens.

features and notes

- Straight back or integrated pull handle
- Generous clean out
- Arm caps are available in wood or urethane
